WHAT IS A FOXION?

FOXION is a network of vending machines with healthy, delicious homemade food, which combines modern tools of traditional business and implemented blockchain technology.

The Foxion ecosystem is built in such a way that each of the services can reach different audiences, thereby helping to achieve the maximum market capitalization of the project.

The goal of our project is to become the global blockchain ecosystem based on the principle of “Eat & Earn”, unite the most popular and effective services to provide income for each of the participants in this ecosystem. Combining this with the ease of implementation, the interconnection of DeFi services and training for even greater mass adoption on the crypto market.

FOXION FOODS MACHINE

FOXION MACHINE IS A TRADITIONAL VENDING MACHINE, WHICH IS ALSO EQUIPPED TO QUICKLY HEAT UP FOOD.

One of the main functions of the machine is a simple and intuitive interface that allows you to place an order using several different buttons. In the near future, we will release a mobile application, where there will be the possibility of remote ordering and payment for the order, which you can receive by pressing just one button when you arrive at the machine.

Creation of a pair of liquidity automatically, by the Unicrypt service, which provides protection against any fraud on the part of the team and guarantees the safety of the funds of all our holders.

The initial liquid pair will be BNB-FOXION, to be able to grow with this token and its ecosystem

FOXION’s long-term growth will be driven by the following factors:

1. Powerful marketing events, partnerships and listings.
2. Converting vending machine change into Foxion token
3. Applicability of the token on the Foxhole platform
4. Burning tokens.

Due to the low emission of only 1,000,000,000 — FOXION will always be in demand in the cryptocurrency market.

Foxhole platform

The Foxhole platform is a platform that brings together real business and the DEFI sector in one place.

The main features of the platform are:

- - Crafting unique nft — “META FOOD MACHINE” with which you can farm
- - Buying / selling ownerships on a Foxion food machine, placing the machine in any accessible place
- - Own NFT marketplace with narrow specialisation
- - Staking / farming of tokens
- - Adding liquidity and getting a percentage of transactions.
- - Swap exchange
- - Multilevel referral system

The main technical goal of creation is All in one application (includes wallet, staking / farming, swap, etc.) with ease of use that even a kid can handle.
